Individualized, Proven Results, Convenient

Individualized—
The screening and risk assessment survey creates a personalized

program just for you. Each exercise is selected for you and your type of pain. Progress through the program is determined by your individual participation.

Proven Results—
The multi-track, multi-level exercise programs use clinically proven

methods to decrease your pain, improve mobility and create strength. Our Care Management team is able to track your progress and are available to assist if you have any questions.

Convenient—
Whether you're at home or on the go, you can easily access your tailored

program 24/7 from your tablet or smartphone. Select between a complete full-length routine or the express version depending on how much time you have that day.
